

Exposure Testing

We support the industry with testing and qualification of polymer materials and protective coating

- State-of-the art equipment
- Accelerated aging
- High pressure/high temperature
- Sour service up to 50% H₂S
- Supercritical CO₂, H₂ and NH₃ compatibility

Typical Standards

- Norsok M-710 and M-501
- ISO 23936 part 1 and 2
- ISO 12736
- ISO 12944
- API, CSA and NACE

Certifications

Recognized test centre for exposure testing of protective coating, thermoplastics and elastomers

- Saudi Aramco approved test laboratory
- ISO/IEC 17025 accreditation for protective coating testing
- IMO PSPC Coating Testing of Seawater Ballast Tanks and Cargo Oil Tanks

Comprehensive Material Testing

- Corrosion resistance
- Mechanical and physical properties
- Microscopy
- Adhesion
- Cathodic disbondment
