

R&D support and strategic advisory

Recognised pilot centre for R&D support to catalyst, polymer and process development

- Technology development
- Catalyst developments
- Polymer development
- Additive recipes
- Application testing

Reactor lab pilot centre

- Catalyst synthesis pilot
- High throughput catalyst screening
- 1-17 litre Lab polymerisation reactors
- All types of polyolefin catalysts
- All polyolefin process configurations

norner[™]

The Polymer Explorers

Polymer testing and analysis

We support the polymer industry plastic with processing, testing and analysis

Industry relevant processing pilots

- Compounding
- Injection, roto and blow moulding
- Blown and cast film extrusion
- Cast sheet and thermoforming

Comprehensive testing and analysis

- Material testing
- Polymer analysis
- Additive performance testing
- Microscopy analysis
- Application performance
