

# Recycling pilot centre and recyclability development

*Pilot centre and laboratories support the plastics industry with development, piloting and testing*

- Mechanical and chemical recycling
- Decontamination methodology
- Recycled material quality
- Novel additive solutions
- Migration and risk assessments
- Mono material solutions

## Processing pilot centre

- Compounding
- Multilayer cast and blown film
- Injection and blow moulding
- Sheet extrusion and thermoforming

The Polymer Explorers

# RecyClass recyclability certification and testing

*We support the plastic and packaging industry in documenting and certifying recyclable packaging*

## Recyclability certification

- Assistance in self assessments
- Packaging recyclability certification in EU
- Recyclability rate certification
- Letter of compatibility for semi finished packaging

## Recyclability Evaluation Protocol testing

- HDPE containers
- PP containers
- PE Films
- PP Films
- Quick test procedures
